

Astra Carbon

Supporting your biochar projects & GTM strategy

June 26, 2025

Incentivizing investment in real climate action.

Where Sylvera could support Astra Carbon

Confidence in project design decisions

Sylvera's Biochar team are **world-leading experts** and can support at any stage of the project lifecycle, e.g. methodology choice & design decisions that might impact the integrity & longevity of the project.

Benchmarking with Market Intelligence

Review and benchmark to other Biochar projects in **Project Catalog** of 21,000+ projects.

Understand demand signals and quality, pricing, & supply trends in the market.

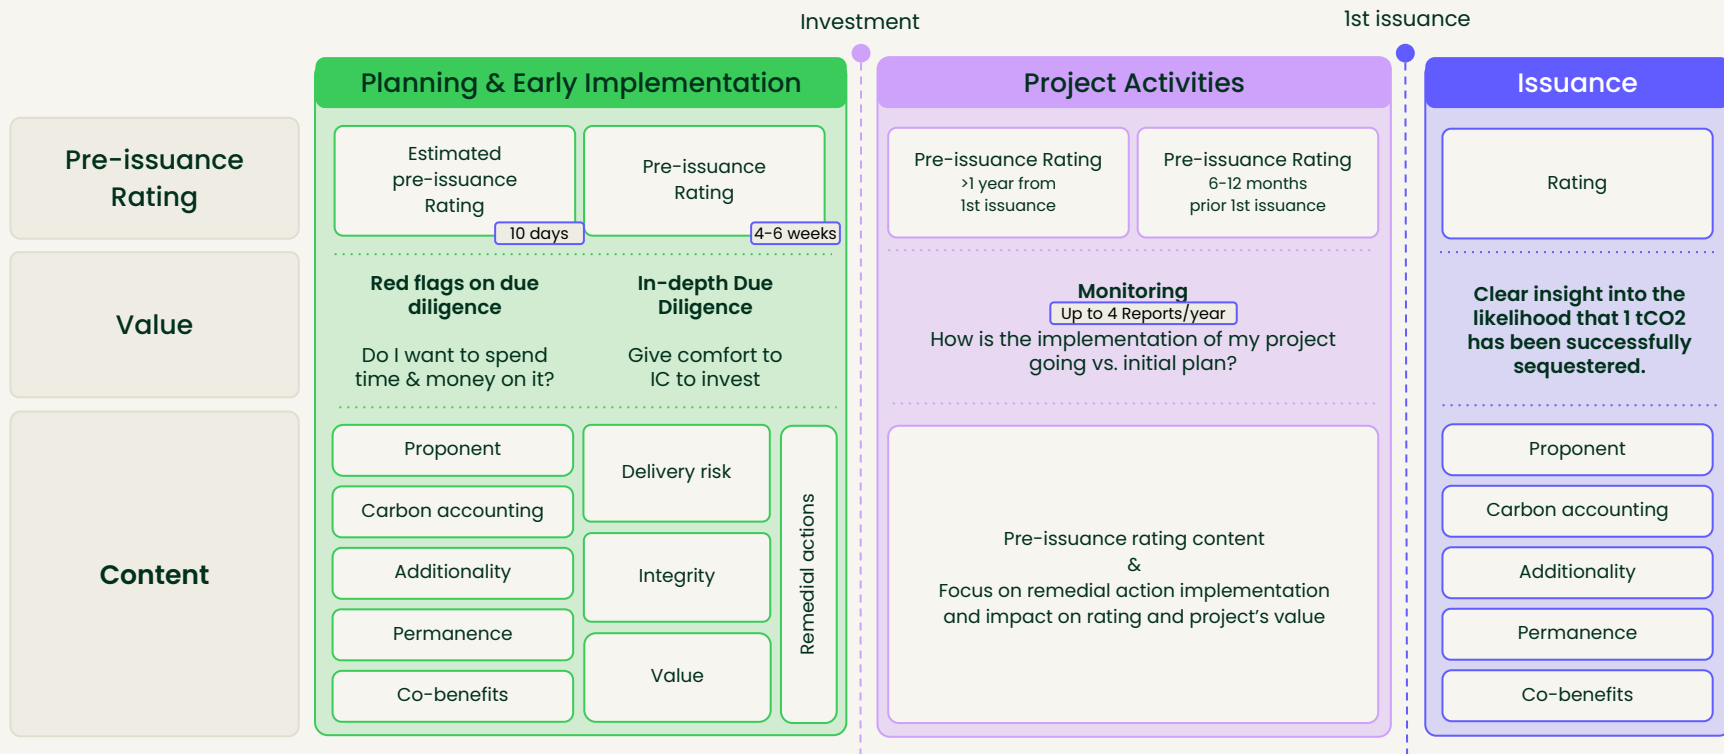

Your GTM Strategy

Sylvera's **Pre-Issuance Ratings**, which include remedial actions and ongoing monitoring, can be used for investor/offtaker roadshows for dependent & ongoing assurance of project quality. List your project on Sylvera's **Project Catalog** for greater visibility & respond to buyer requests.

Project-level assurance

Examples of Sylvera support throughout the project lifecycle

Sylvera's Biochar Experts

Meet some of the team!

Astra Carbon can draw from a team of Sylvera experts

Profiles of our CDR team

Simon Manley

Director of CDR

Simon Manley is a leading carbon removals specialist having spent:

- **15 years in durable CDR**
- **11 years in Biochar at Carbon Gold**
- 4 year in Enhanced rock weathering at leading developer UNDO.
- Simon worked at the **world's first ever commercial biochar project** in 2008!

At Sylvera: Simon leads our growing CDR practice at Sylvera. He brings his deep expertise to methodology and framework development and external liaison

Paul Budin

Head of Tech-Based Solutions & CDR

Paul Budin is a carbon removals and technology-based solutions expert with deep cross-sector experience in project finance, carbon markets, and project evaluation:

- **6+ years in carbon markets and project finance**
- **Lead author of Sylvera's biochar framework**, and of several other TBS frameworks
- **Member of the ICVCM Biochar Methodology Consultation Working Group**

At Sylvera: Paul leads the development of rating frameworks for engineered carbon removal solutions including Biochar, DACS, BECCS, and more. He brings financial and methodological expertise to some of Sylvera's most strategic client work, including with sovereigns and major multinationals.

Annalise Downey

Director of Climate Solutions

Annalise leads the technical consulting team to help clients and partners navigate risk in the voluntary carbon market and ensure their carbon strategy drives real climate impact.

Annalise was the 7th member of the Sylvera team and began on the ratings team working to develop the firm's first frameworks and ratings assessments. She has worked closely with Fortune 500 companies to build tools and processes for risk-based decision making for biochar, BECCS, ARR, and DAC portfolios.

Profiles of our CDR team

Syakira Saiful Yazan

Carbon Analyst

As a Carbon Analyst with Sylvera's Ratings team, Syakira was a core member of the team contributing to the development of Sylvera's Industrial Biochar Ratings Framework.

In addition to CDR, Syakira is also a lead analyst for several Sylvera's Pre-issuance reports for NBS projects and Sylvera's Renewables Ratings.

Prior to Sylvera, she spent 5 years working in climate investments and power sector policy.

Mattia Dell'Ova

Technical Manager and LCA Lead

Mattia joins the Sylvera team in June and was previously an LCA Specialist at CarbonQuota.

Mattia's role at Sylvera is to lead the technical evolution of our LCA frameworks. Led LCA strategy development and automation at CarbonQuota, enabling packaging suppliers and brands to integrate ISO-compliant sustainability metrics into procurement.

While at Sourceful, he spearheaded deployment of dynamic impact data tools, including the development of an ESG strategy with circular economy metrics for BNP Paribas.

Alyssa (Yurui) Kang

LCA Senior Associate

Alyssa joins the Sylvera team in June with a strong foundation in carbon project evaluation, life cycle assessment, and GHG accounting.

Previously Senior Impact Analyst at Matterna, she led cross-functional sustainability projects across regenerative agriculture, carbon removal, and environmental impact assessment. Holds an MSc from Imperial College London, with a focus on Integrated Water Management and climate policy.

Alyssa's role at Sylvera is to extend our market-leading, peer-reviewed LCA analysis as part of our emerging carbon removal technologies framework, enhancing transparency and scientific rigor in voluntary and compliance carbon markets.

Sylvera's biochar framework was developed with world-renowned experts

Simon Manley

Director of CDR

Simon Manley is a leading carbon removals specialist having spent:

- 15 years in durable CDR
- 11 years in Biochar at Carbon Gold
- 4 year in Enhanced rock weathering at leading developer UNDO.

At Sylvera: Simon leads our growing CDR practice at Sylvera. He brings his deep expertise to methodology and framework development and external liaison

Prof Aiduan Borrión

Professor Environmental Engineering -UCL

Prof Aiduan Borrión is a Professor of Environmental Engineering and Head of Environmental Engineering Section at UCL and holds a PhD in Environmental Engineering and Clean Energy Technology from UCL.

As an international leading expert on life cycle assessment (LCA), Prof Borrión regularly provides advice and consultancy service to government departments and business organisations on carbon reduction, net zero strategies, and sustainable development.

At Sylvera: Aiduan is a member of our Technical Advisory board. He has supported Sylvera in the development of DACS, BECCS, Bio-oil and Biochar project frameworks.

Dr Mairi Black

Life Cycle Assessment Model support,
UCL Energy Institute

Dr Mairi is a LCA and Sustainability practitioner, and has been working on bioenergy / biorefinery for over 20 years. She currently works at UCL, where she is a Senior Research Fellow, and at the University of Surrey.

Background: with a PhD University of Surrey, Dr Mairi worked with Sylvera on creating the in-house LCA model to assess emissions for durable tech CDR projects.

Quotes from Biochar Developers

Trusted by leading biochar developers

Why partner with Sylvera?

“Our collaboration with Sylvera has been an important step in reinforcing the credibility of our work. Their thorough analysis not only confirms the effectiveness of our processes but also helps us continuously improve the quality of our CDR. As pioneers in large-scale biochar production, we recognize the value of rigorous third-party assessments in strengthening trust within the market.” – **Francesco Guglielmi, Chief Marketing and Sales Officer, Exomad Green**

“Sylvera demonstrates a deep understanding of the challenges and opportunities in the ever-evolving carbon markets. They are committed in providing accurate and fair solutions that connect project developers and financiers in this asymmetrical market.” – **Siddharth Kaul, Director Carbon Projects, Alcom**
